### Smart Joystick

Easy operation, get a quick start: Make the wheelchair fold and unfold automatically; Own speed adjustment, horn alarm and battery level reminder function, support left/right exchanged installation.

### Smart remote-control handle

Intelligent APP and remote-control handle can manipulate the wheelchair at a distance, flexibly let the wheelchair go forward/backward and turn around, automatically fold and unfold, also it can turn on the headlight and horn.

### Adjustable armrest

In line with artificial engineering, convenient for users to get on and off

### Multi-functional rear anti-tippers

In the process of riding, it can act as anti-tip wheel, also can be as support stand after folded.

### Removeable battery case

Removeable battery case design, convenient for charging and travel

Size	Folding size	Max.load	Body weight
1076X620X987mm	842X620X420mm	130kg	29.6kg

**H3PS** 19.5KG  
Brushless motor

Full-automatic folding  
electric wheelchair

**APP remote**  
Move the wheelchair by intelligent APP remote control, also App can self-detect fault, show riding speed, mileage, gear and so on.

Net weight	Size	Charging time
19.5kg	955×605×855mm	7h
Max. speed	Folding size	Max. loading
6km/h	950×605×340mm	120kg

Optional

Battery	Battery weight	Endurance
524Wh	3.3kg	20Km distance

**H3P** 18.2KG  
Brushless motor

Manual-folding  
electric wheelchair

**Manual folding version**  
Can be folded according to actual needs. The pedals can be freely removed for easy storage. The frame is sturdy and durable, and the maximum load can reach 120kg, which makes it safer to use. The battery is detachable and charging is more convenient.

Net weight	Size	Folding size
18.2kg	955×605×855mm	950×605×340mm
Charging time	Max. loading	Max. speed
7h	120kg	6km/h

Optional

Battery	Battery weight	Endurance
524Wh	3.3kg	20Km distance

**A6P**  
19” Big wheel  
Self-balancing wheelchairs

Big and wide wheelhub, excellent grip performance, bring you more comfortable riding experience.

Wheel size	Max. permissible gradient	Wheel width
19inch	~10°	125mm
Max. speed	Charging time	Battery capacity
~9km/h	~ 240min	680Wh

**A6**  
Self-balance  
personal transport

**Alterable handlebar**  
Lightweight aluminum frame, comfortable cushion and removeable joystick controller with LED display make A6 unique.

**Control mode**  
It relies two ways to control. One is the change of gravity center to go forward and backward and the other one is the joystick controller for riders to turn directions.

**Alloy kickstands**  
The high quality front and rear kickstands make it parks tably and safely.

Item weight	Size	Max. speed	Wheel size
40.6kg	680×600×945mm	~9km/h	14inch
Battery capacity	Folding size	Max. loading	Max. permissible gradient
520Wh	540×600×590mm	90kg	~10°
